

Symantec AntiVirus™ Enterprise Edition 10.2

Comprehensive malware protection for every network tier in a single, easy-to-deploy solution

Overview

Symantec AntiVirus Enterprise Edition provides proactive threat protection for client systems, content filtering, and spam prevention for the Internet gateway and Domino® and Exchange environments, along with virus and spyware protection for enterprise workstations and network servers. This comprehensive, easy-to-deploy solution automatically detects and repairs the effects of spyware, adware, viruses, and other malware. Side-effect repair keeps systems operational during security disruptions. A comprehensive view of clients via centralized logging, threshold alerting, and graphical reporting helps transform security data into actionable information. The solution now offers antivirus client support for Linux® and Microsoft® Windows Vista™.

Key benefits

- An integrated suite of Symantec's award-winning Mail Security for SMTP, Mail Security for Microsoft Exchange, Mail Security for Domino, AntiVirus Corporate Edition, Client Security, and Web Security solutions
